A step-by-step set of instructions to help you get started using i-Pathways.

Getting an i-Pathways Account

In order to get started, you need to have a password and login for i-Pathways. This process begins at the adult education program. Once they create your account, you will receive an email from the i-Pathways system. It is important to follow the directions in the email.

NOTE:
1. If you do not see an email from ‘i-Pathways’ do-not-reply@cailt.org in your email, please look in your junk/spam folder.
2. Click on the link in the email to create your password. It must be 8 characters long and is case sensitive.

NOTE: Your email address will be your login ID for i-Pathways.

Getting Started

Once you are logged into the site please visit the i-Pathways Support Center. The link is found on the black bar at the top of the i-Pathways screen. Watch all six tutorials in order to learn how to navigate the system.

1. Overview of Student Center – A brief overview of the tools available in i-Pathways.
2. Viewing Your Portfolio – Explore how to monitor your progress and view instructor feedback.
3. Student Profile – Learn how to set up communication features within i-Pathways.
4. Resources and Support Center – Locate resources that support learning in i-Pathways.
5. Message Center – Understand the main communication tool in i-Pathways.
6. Starting, Navigating, and Submitting – Understand how to start and submit a lesson in i-Pathways.

Once you have viewed all the tutorials, send any questions you may have to your instructor using the Message Center.
Creating Your Learning Plan

It’s time to start accessing the i-Pathways curriculum. When you login, the first screen you will see is “My Modules.” Select the module and complete the Placement Survey. This assessment is the first item you will see when you click on the module name. Once you submit the survey, the i-Pathways system will automatically grade the survey, identify your strengths and weaknesses in the content area, and identify lessons you need to review.

If your teacher has selected Skip PreSurvey at registration, all of the lessons in the module will be marked as Optional.

Although the i-Pathways system automatically tracks your progress, you can also use the Tracking Forms (found in the Resource Center). Simply mark lessons that were identified as To Do or Optional. Then, work with your instructor to create an individual learning plan.

- Identify when you want to take your High School Equivalency Exam.
  (Example: I want to take the Science portion in 4 weeks.)
- Add the number of lessons that need to be completed and then divide by your goal. (Example: There are 16 lessons to complete. 16 divided by 4 equals 4. You need to complete 4 lessons each week to meet your goal.)

Now, you are ready to start learning! Remember that learning online does not mean learning alone. Communicate often with your instructor and review any feedback given.

If you need any assistance navigating i-Pathways please contact the Help Desk.
